

GA

The illustration depicts a person with long brown hair and headphones, sitting at a desk in a dimly lit room at night. They are looking at a laptop screen. A desk lamp with a green glow illuminates the desk, which also holds a potted plant and a cup of coffee. In the background, a window shows a night sky with a moon and rain falling. To the left of the person is a bookshelf filled with books. The overall color palette is dominated by dark blues, greys, and the green light from the lamp.

data science problem

Problem Statement

An F&B company is keen on a new business and marketing model organizing food truck events in Singapore to increase the exposure of their branding and create a unique experience for consumers. But outdoor events are exposed to the elements of weather.

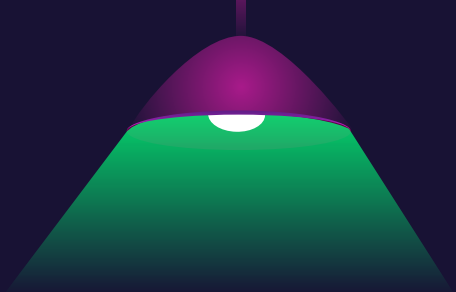

02

Insight 1

East or West?

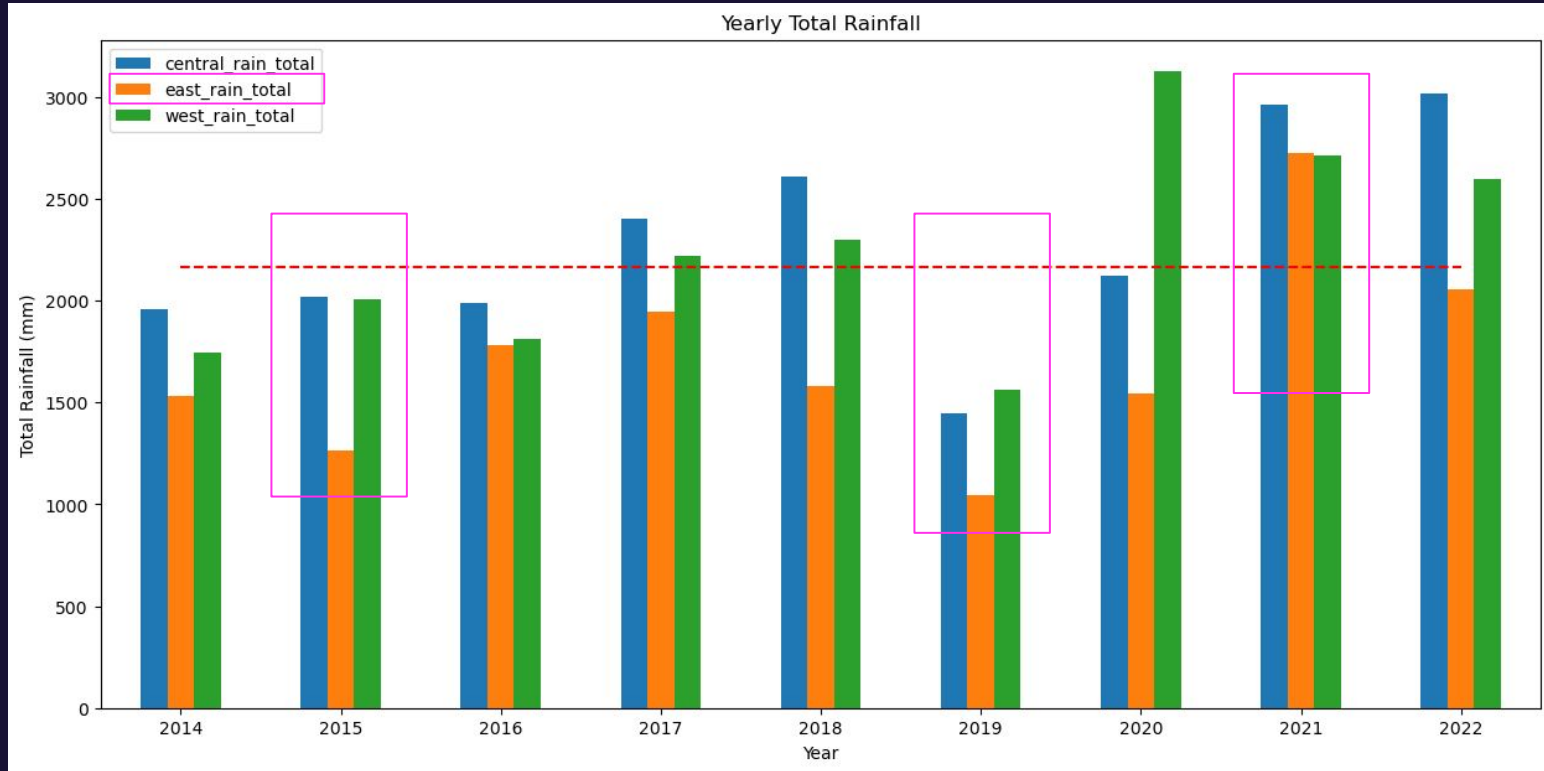

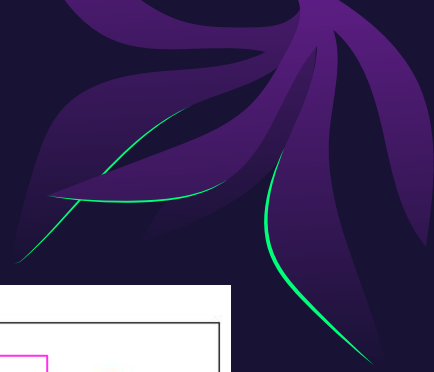

25%

Eastern Singapore received 25% lesser rainfall!

Yearly Total Rainfall

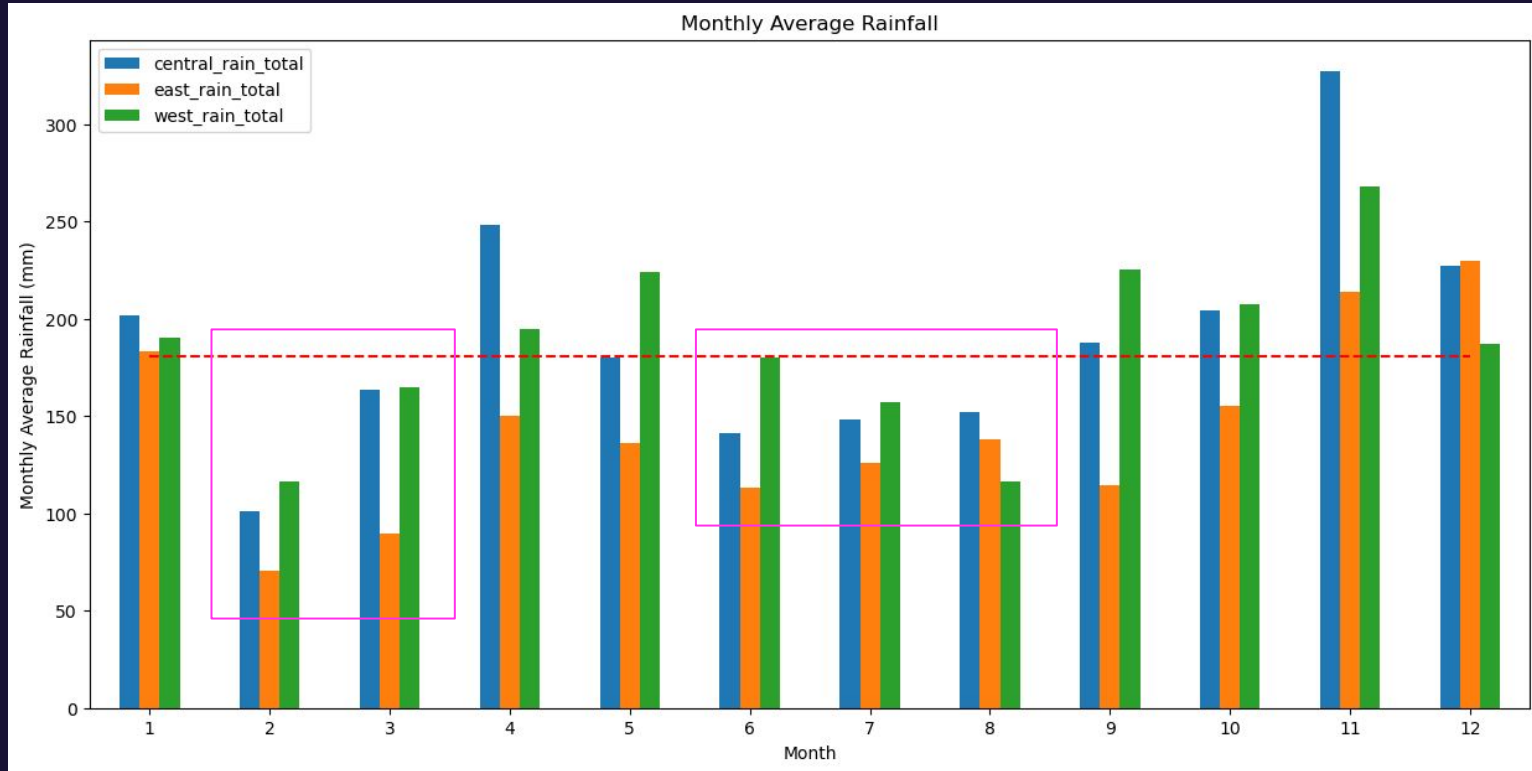

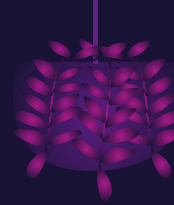

03

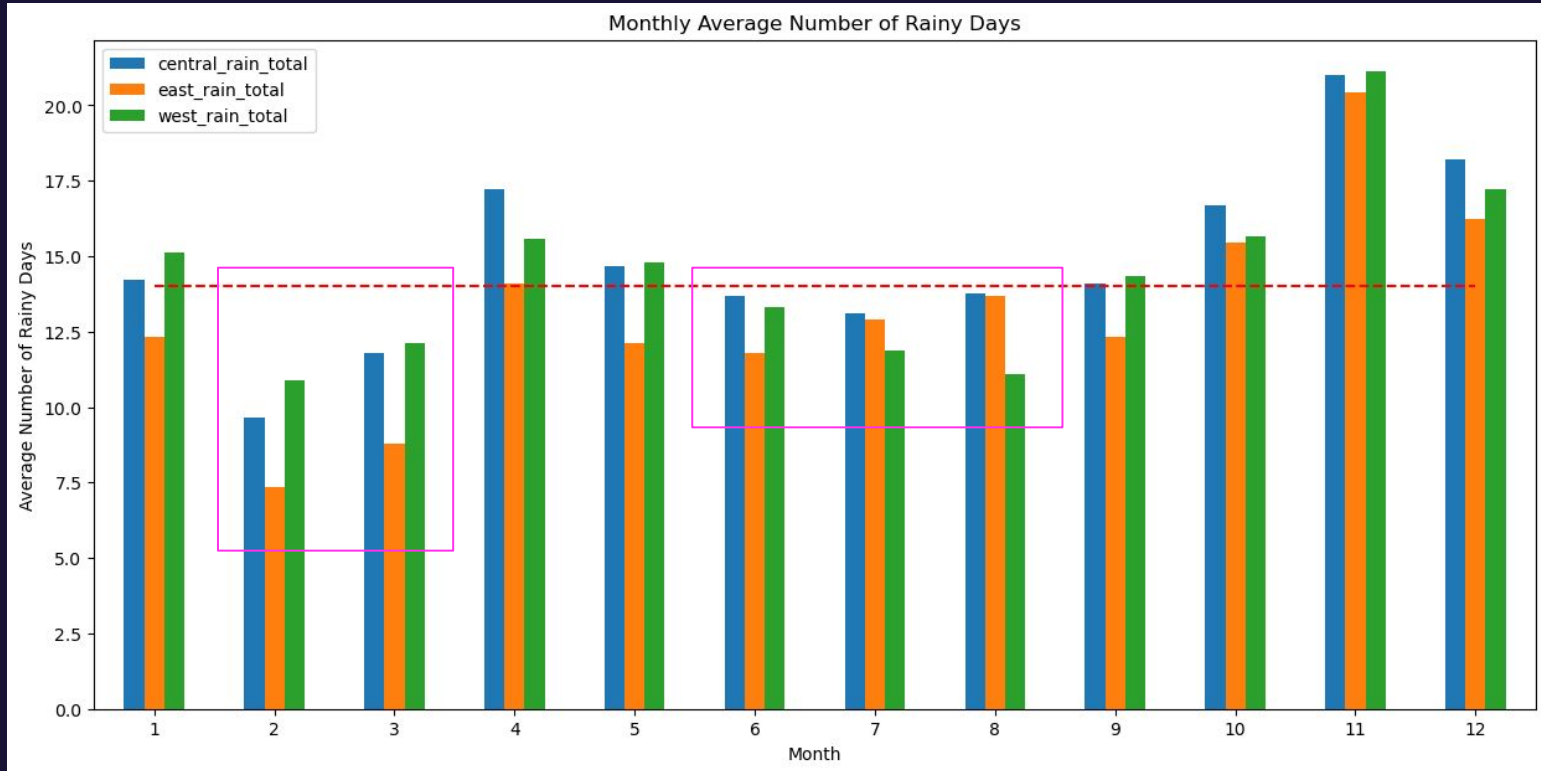

Insight 2

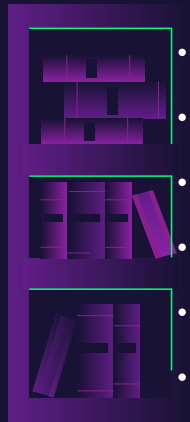

Month with the lowest
Rainfall?

Monthly Avg Rainfall

Monthly Avg Rainy Days

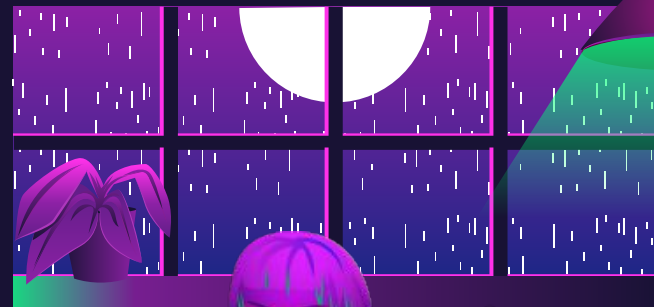

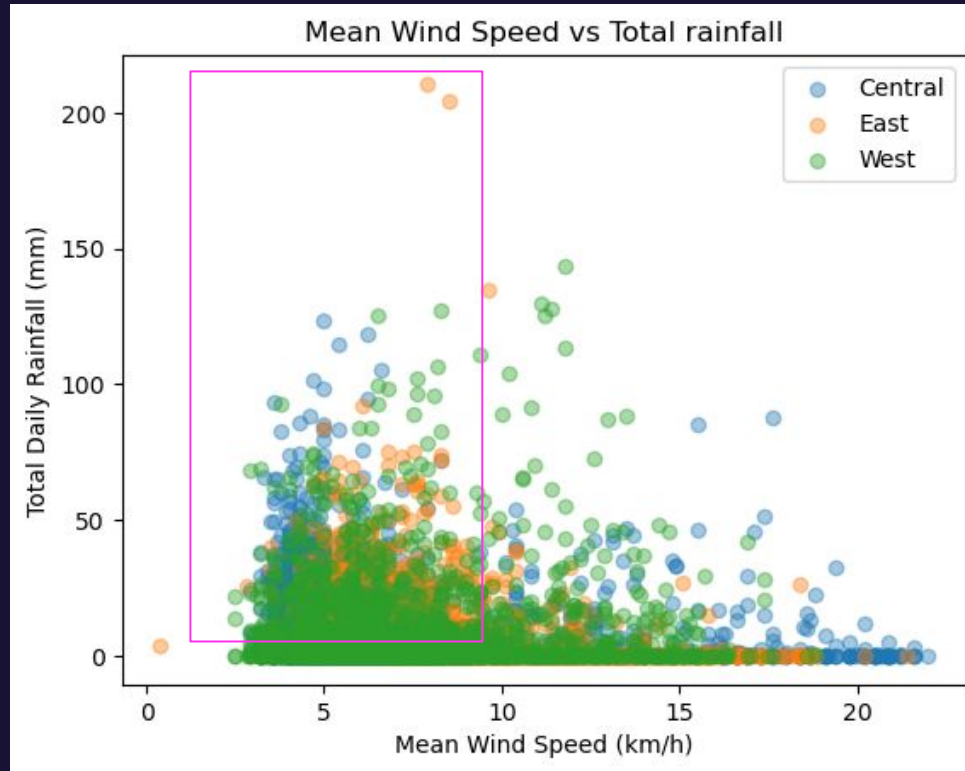

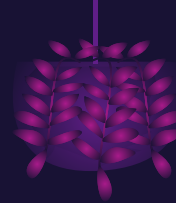

04

Insight 3

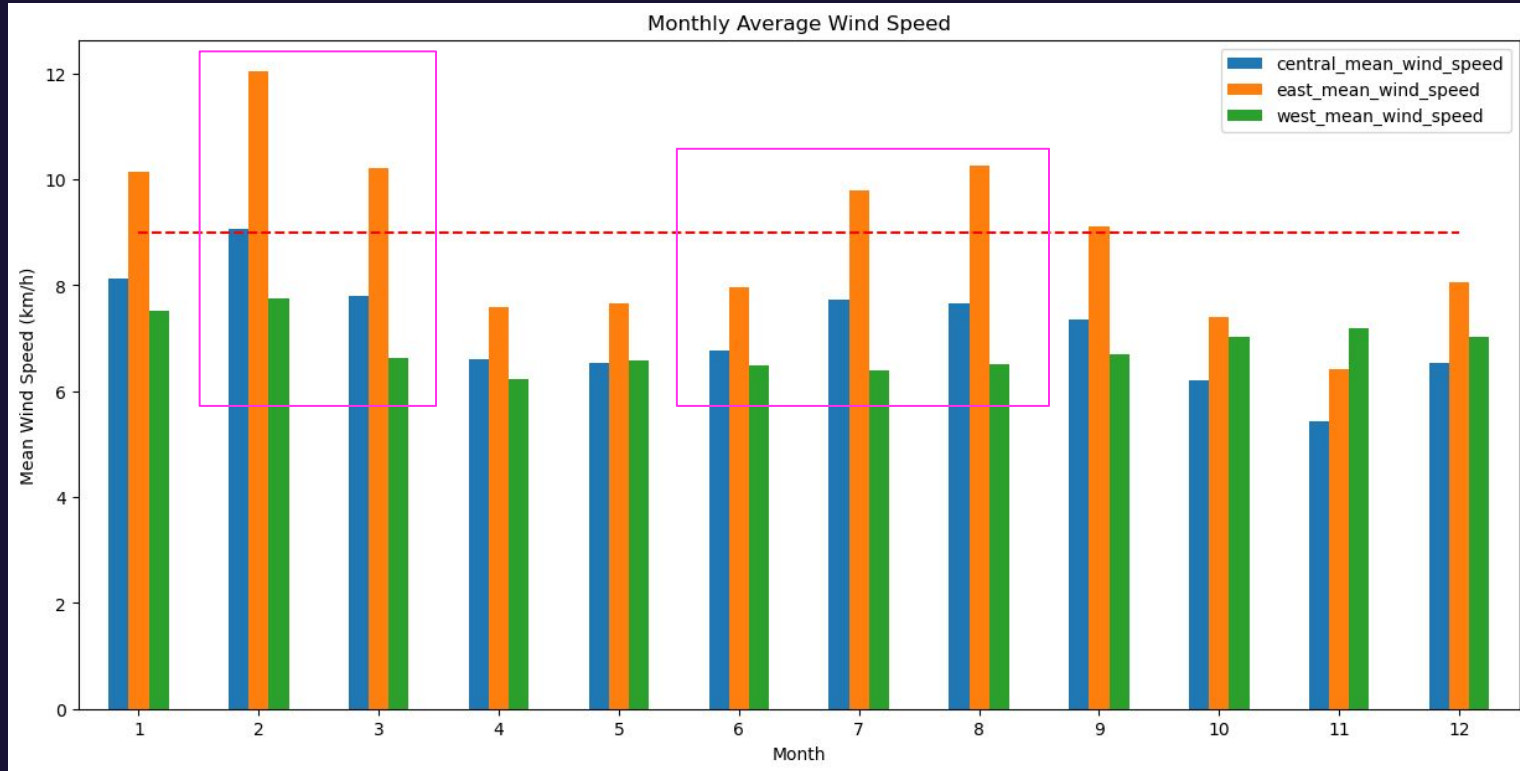

Higher wind speed
= More rain?

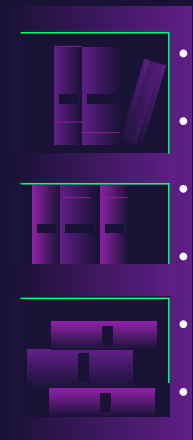

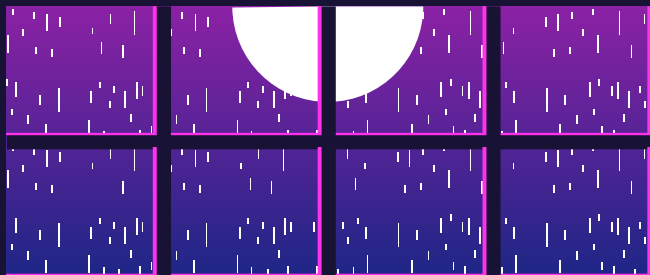

Monthly Avg Rainfall

Monthly Avg Wind Speed

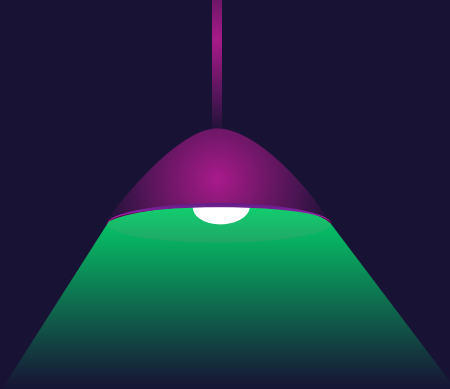

05

Recommendations

Any solutions?

Recommendations

When

To organise the event between Feb to Mar or Jun to Aug.

Where

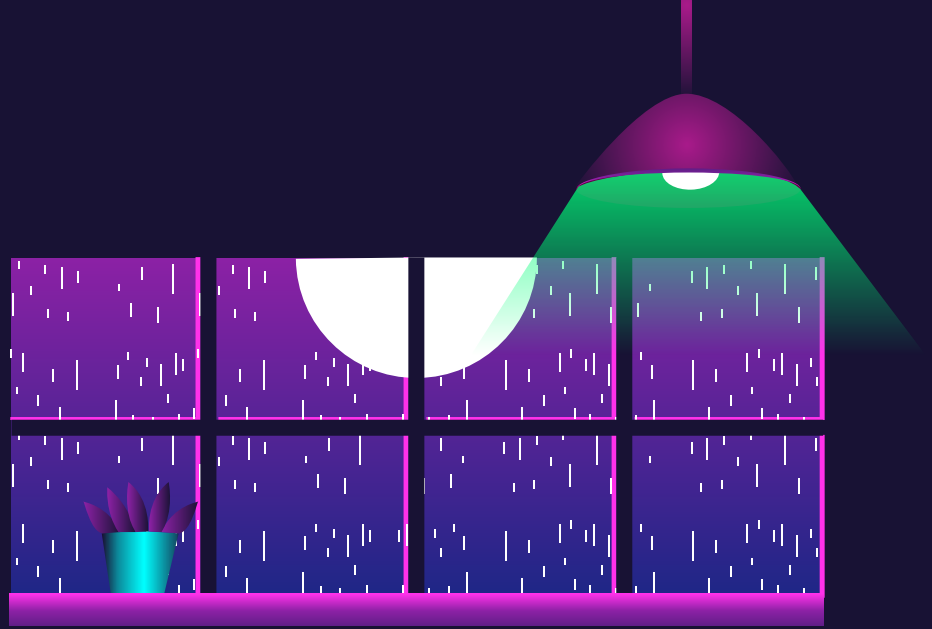

Eastern parts of Singapore such as Singapore Expo, East Coast Park and Changi Exhibition Centre etc.

What

Can consider some wind-related props or products to use / sell since East is generally windy.

Thanks!
